

I live in the mountains of Southwest Va. I got XM radio so I could listen to radio without having to change stations every time I went around a curve. Just like satellite TV, we pay for this service. Tell the NAB people to get off their butts and improve their services and stop asking for handouts. That is the big problem with this country now. Everyone wants someone else to do their work and they want to just sit and collect the profits. How about helping the people of this country and not the big shots that get rich off other people doing the work.

Thank you for your time,

Dean
